DATE	CLASS SCHEDULE	ACTUAL SCHEDULE
24/7/2026	**Assign1:** Basic Student Database implementation with parser and command line arguments	
31/7/2026	**Assign1** continued	
7/8/2026	**Assign2:** Fork and exec experiments	
14/8/2026	**Assign3:** Pipe and FIFO experiments	
21/8/2026	**Assign4:** Multithreading and Signal experiments	
28/8/2026	**Assign5:** Client-Server version of the first assignment with FIFOs	
4/9/2026	Assign5 continued	
11/9/2026	**MINOR – 1**	
18/9/2026	**Assign6:** TCP Echo Client-Server program	
25/9/2026	**Assign7:** Convert the TCP Client-Server program into a concurrent server using threads and an iterative server using *select()/poll()* system calls	
2/10/2026	**HOLIDAY**	
9/10/2026	**Assign8:**	
16/10/2026	**Assign9:** Implement the student database with TCP sockets and as a concurrent server/iterative server or as a UDP client/server	
23/10/2026	**Assign10:** Assignment 9 continues	
30/10/2026	**Assign 11:** Convert the TCP echo server to use advanced TCP I/O functions *send()/recv()* and *vectored I/O*	
6/11/2026	**Assign12:** Implementing some of the socket options – IP_TTL, TCP_NODELAY (with small packets), SO_LINGER, TCP_MAXSEG	
13/11/2026	**Assign13:** TCP current time server as a daemon	
20/11/2026	**MINOR – 2**
